

Part 1

Migrant years of a Leinwebergesellen

Slot.

From wandering a Leinwebergesellen (Walz), we report of a migrant booklet wrote.

But first, we want a little slit and his famous lines addressed. Both belong together and everyone older Schlitzerländer still remembers the aufgeflockte lines in the meadows. Whether on foot or by bike arrived by train or car arrived, it was a familiar sight, belonged to the years just 50iger together. Now was not the only local bleaching linen brought, it was also good from the environment to do so. These "advantage" was also the Weber family Mohr from Breitenbach a. Herzberg. Our hiking society Johann Adam Mohr (born in 1814 in Brtb) and his sons and grandsons were certainly a long way to purchase. Also, the product was often a woman messengers (the week ran through the forest) entrusted. From stories I know that Mohr * s children and grandchildren also this arduous path through the forest to slit measures. At that time there were no railways. It is a certain respect for these efforts do not help. Something good did it for our migrant society, he married a woman from Queck, he certainly know his business. Hiking Society Mohr was a master in the Damastweberei to which it safely through the marriage of his father Conrad with the daughter of a Damastwebers found.

That is relatively little Damastweber in a very leash weaving region was facing, was mainly due to the fact that this special skill required. Especially with woven damasks pictorial representations, the so-called Gebildzeug were very beautiful but also expensive.

The Damastweberei demanded by Webern great skill, years of experience, technical skills and a shot artistic empathy.

Of course, not only woven damasks. At the beginning of its activity after wandering Adam Mohr presented a book in which he has the all orders eintrug. His first job was more than 38 pieces handkerchiefs, on 13 October 1841 have been delivered and 2 thalers and 11 silver groat revenue.

Mohr supplied not only to private buyers but he also worked in wages for foreign manufacturers in the so-called publishing system. It was not only "rock stuff for Frauensleut" woven table linen, but also with the emblem of the family prepared. As Mohr was very progressive, he had a particularly large loom with punch cards for pattern formation, so that each could be lifted warp, which served to fine jacquard pattern formation of damasks. Reich, the Mohr's by weaving not. Mechanization, 1 World War II were added. They lived modestly from a small agriculture that can operate alongside.

The last Damastweber in Breitenbach was Konrad Mohr. When he died in 1972, was a family business to the end of 1841 by Adam Mohr had been established. If I'm right-oriented, there is a loom in the Mohr Schlitzerländer Heimatmuseum. A niece of the House of Mohr was my deceased sister Anna potions, Wettlaufer born

from Hatterode. The name Mohr died in the parental home from our hiking companions.

Another son, Charles learned the Damastweberei his father, Adam Mohr, he married a Sophie Faulhaber. He was the great-great-grandfather of my husband Karl. My late father also learned weaving, visited the Webschule in Lauterbach. A photograph of the great-great-grandfather is still in our possession. It shows him sitting behind the loom. Because electricity was not yet in place, hung a large lantern at the top of the loom. How tedious it must only work one. He also wove almost exclusively damasks for the nobility and wealthy families, such as Henschel, of Harnier in Kassel. Very nice altar blankets have also been prepared. In an old browse through the book I still enjoy today.

The damasks been to Amsterdam and sent Silesia. It is also not become. The gold crowns were accumulated in the 1st World War for the people and the motherland donated.

Weber A few boats, some of the finest container yarn, commenced mailbags and a beautiful yard are left over from the Leinweber Mohr.

Anna Tränker received the book, as they maintained their marriage with Konrad Tränker Queck moved after 1950.

A former times for moving and adventurous life.

Hiking report

Because I experience through attention has been made by a carpenter'm Gesellen Jochim Rethwisch name from Kiel which his travels of Eleven years on paper has been and how he has gone, and all the strangeness of the cities to which I am a travel book of the journeymen to Read unverhofter got so, so as I got tremendous Luster me such a book to establish if it is God's will, and even long Live, I did the trip from Haußen until Preetz not recorded, but what I'm still on my journey in care fernerhin will take place.

Kurhessen

Breitenbach: 1836 Breitenbach my birth place, I have the 8th March 1836 and left my brother accompanied me to walk up to 2 hours Niederaula where we ate breakfast together and then took leave now, I had 1 miles, so I came where I still Hersfeld merere verwanden who met me in front of the city reserved Did Gömbel jointly with his wagon where Mr. Fetter Gutberlet and Mr. Fetter Ernst Vollmer with a sat, what I encountered in the city, where I still Fetter Vollmer asked where I wanted to, where I gave him to reply, after Hanoverschen, so she wished me good luck on the trip and I went on and came after the village where I Friedlos the first Glopfen went to a school and since I got 2 bright now, I went on and I came to Orthschaften after Rothenburg where I am still not be halted in the day was still there and made the other side after 2 hours after a village where I stay, and since I met my step-brother Adam Koch and happy because we Königlich together, when I also the first day of the trip was the evening we ate dinner and slept Brodt still together, and in the morning we would have some brandy glass of wine, and so we separated, and the evening, I met also another two travel Kolegen jointly Two farmers a bricklayer and Stellmacher, we Reisten the 9th Merz Frölich together, and came after an early morning breakfast Melsungen here we also had a man Bey us what Bey under way forward was to show us before Melsungen in the forest, where several years ago the butcher dodt was beaten, the stone where they Gedöttet with him, was yet to be seen, he was placed in a tree which is in two scion in the amount grown between where he was and there was the festivals Grown. And as we are now free time together now, we went away, in front of the city lived a weaver champion since I was awarded because I met a journeyman

who in Homberg worked with me, we had even talked about this and that and then took Atje and went back to my Kolegen this day and we came after Cassel my residence where I stayed over night, my first course was the bodyguard barracks where I first picked up Chr. summer, which brought me to Heßenpflug in which the body Regiment was, which was not to Hausser, only his wife and said I should stand up and my Felleisen should come back in the evening, and so we were still around in the city and even the besahen Frederick Carls and Königsblatz on first is the royal palace and in the middle of Landgraf Friedrich and the Carl Landgraf Carlsblatz the picture in this column where Blätze also the name of the lead and Königsblatz circle is round with a six echo when you're in the middle and retrieve, then I have not seen Cassel which to me but to this day remorse is that I no longer seen, because I do not know if I was back up, I was still Fiesieren, and then we went back to our well-known, and because he was on the Haußen evening we eat the rest of sausage together and then I went to bed and the morning they made me make the coffee as I drank, I took my Felleisen on the hump and went and came into the Hanoversche, my travel companions, I had before Cassel leave and took us back to the wall also hostel I met a family au Gosmannsrothe my father's birthplace, which wanted to emigrate to America. And what I must be particularly noted that each tourist Messi 6 groschen when Fiesieren should pay what I can not hit, field penetrated the 10th where I can stay a little new town which is a few years ago was completely burned down by now, I came here after the university city of Goettingen a Also worth, where we are but not for long delayed Fesper we ate and went around, and I should have a job but I did not so we went in the biggest hurry from here, and how we came before the city Grif I still after my money, and I found it at the moment so I am not the Todt touched me again, I looked around me and thought it was dust in my coat because I thought how happy I am that you have your money back, and so I went full of joy after Nordheim where we stayed over night there is a small but lively town because many roads crossing in the morning we went over the river outside the city, which went to Hannofer and I wanted to go to Brunswick, and now I had a tailor travel companions and then came We Seesen which is an old city but she has but a Russian steam and sulfur Bedt, we thought we've spent significant time here and went on until the day after Salzgitter with a salt plant, the art is still driven by windmills, here we were both on my hostel, and at night I still had two lice is set up now but I made that I did continue, and while it began to rain tremendously, where I wet through and through, I was Kert Bey a weaver in one village where I'm dry again, I also directed his Bargende weaving different than what he had, where they thank me very worth bewirthenen and journeyman brought me to denWeg after Wolfenbüttel, a Wohlgebaute Beautiful city, with wide streets, is also it used to be the residence Braunschweiger been ocher through the city, where in several places in the city via bridges, also is the Braunschweiger ironworks I can stay here and because I found the two birds which I Salzgitter had caught by this fisielirt, but it did not go because they are no longer found in the morning I went around but I got no work so I went to Braunschweig Regelmußige city. here I have a number of days worked, where I know not much more than that a nice Meßhaus, and a beautiful wall with plants here, and here everything is the largest hall with a garden around the city which mostly with pleasure houses are, and the Spent Castle was in the biggest move to build, I could not even notice them, dieweil it still stood Gerüßt, but as I Heard it with the best in Germany, even I have the Grand Parade viewed here. Hildesheim formerly the residence of the Bisthums but now hears it Hanofer, where I have 1 1 / 4 years, work, and mostly

from the city experience, that half the population is Catholic and Lutheran latter, the city itself is still part Altmodisch Built But seeing Werth, there are still tens of viable churches which six Katholisch u, four are particularly Lutheran is noted to the church where the Thurm, the Kohr on what gold with Masivem occupied also the head is pure gold, and the roof is pure copper, with much objection sculptors work alongside paintings, many figures in the cast, the chandelier in the middle of the dom contains 72 lights in a round which is about 1 / 2 feet of each other standing, is also at this church Roßenstock which is already 1000 years will be at the forefront Dohmblatz is a metallic image column with all kinds of characters Alterthum, and on the rear Dohmblatze the Catholic High School or the Josepfinum called the most beautiful Lutheran churches were the Lombardi, on the New Town, and the St.Andreas on the old city of salvation, and near dabey the Andresium the Lutheran High School or the Gimnasius, nuns and parish Glöster of earlier times used to err Anstalten-Equipped are the Bey Michalis Gloster is a church like Naam, where the To err a Kugelbahn inne should have but which have long years to God dinst no longer gedinnt has, at the heart of Wall Bey Bridge is the Sister Koster what a lunatic is both institution-and surrounded by walls and the houses all Masiv, on the Beinke is the St. Godehardi Gloster which a guard and the prisoner has Hanöfersche State, near a church because Bey same name, this church has three Thürmer, two are close against each other, and the third is just between the two over which the largest is, it also should have been a masterpiece that is saved on the lasting value Kath-house is the clock, where a night watchman and a Judendhopf truth is that the old days before the city verrathen what to Denkzeichen here is when the clock Post Reist each stroke of the Jews at the mouth of the head and does it again, over the head, the Jews all over the nightwatchman Altdeutsche shape in the suit with the guard horn which each bell strike Bläßt. Also, I have here a new bishop Einweihung views with me because of what many Zermonien dabey, has made much fun. Also, I particularly noted that free shooting to be the best in the whole country, which takes in the whole of 14 days, 2 days, but only the journeyman to go out, the Monday and Wednesday wlches the main days, the lift is probably from several hundred citizens who are in eingetheilt company, on Monday they Batalionsweise after Schützenhauß a Esyadron on horseback, Adirlerie with two guns, grenadiers with large Bärthen, and make a bachelor Batalion, all black clothes with white skirts and trousers appear each his own Batalion Musick and his own flags, the city is free from shooting with wreaths and Ehrenforth decorated, and the Wednesday evening fireworks Moritz of the mountain is located in a suburban mountain, and on top of the mountain with beautiful plants, where the entire city of Hildesheim can see. Also, the city has a beautiful wall where people around the city can go to the July 21 emigrated from here in 1837 Cahstedt stay in the basement, where I have a fellow countryman of name from tooth Cassel, a builder of a Jew is. Hanover the 22ten I came here where I am free of the evening with fireworks shooting had viewed, which I very much enjoy making thousands of people with which it beywohnten, it began before Schützenhaus, the fireworks was in a great round and in the middle focused on the guns, where the fireworks always Kanonenschüßen was broken, the first Saturday after my arrival, I was under the Reformirten Church, and from there after the Grand Parade, which the new king, even with attendance and so bsah I Wundervollste Muemend based on The parade ground is the July 22, 1837, I was on the Muemend what still can be found in the book where many of their names to a letter it been that has 189 steps up from the bottom to top, what goes around, which is Trepp with an iron gelemnert and above

there is a chair when one is sitting there au, can be done in the whole Mue ment herumsehen top is a 4-square held to around where the whole town can see, and stands on top of an image column which is the victory goddess called is that it is of copper and stands with one leg on a ball, and in his right hand and a sword in a wreath on the left, which you with outstretched arms in hand, are now below Generales all their names, which Wandertooschen campaign to have made, and 8 captured guns are walled in on each page 2 even here on the wall a picture in marble pillar by a famous philosopher Leibnitz name, even the whole town with Gaß enlightened.
(To be continued!)

Johann Adam Mohr.
